Why the Refresh?

Refreshed every year

This time a major refresh

Planned for 21/22

Lockdown hastened these changes

The unit is expanded and 'more' complete

Changes in the definition of UX as people become a little more confident in postulating what it actually is.

Changes for this Version (4.0)

1. Some reordering of the Material
2. Some change in Emphasis
3. Addition of Sections on Visual Design
4. Addition of Sections on UXD and what Graphic Design
5. Reintegration of UX development overview
6. Move of Anatomy to 'contextual' work
7. Some addition of light statistics (mostly a rant by me!)
8. Change in Topic titles to make them more Descriptive
9. Addition of Video Lectures and Audio Podcasts
10. Change in Assessment by Removing the Exam

COVID 19 Provision

This is a Major Update that COVID 19 forced

Its been put-off because of the amount of work

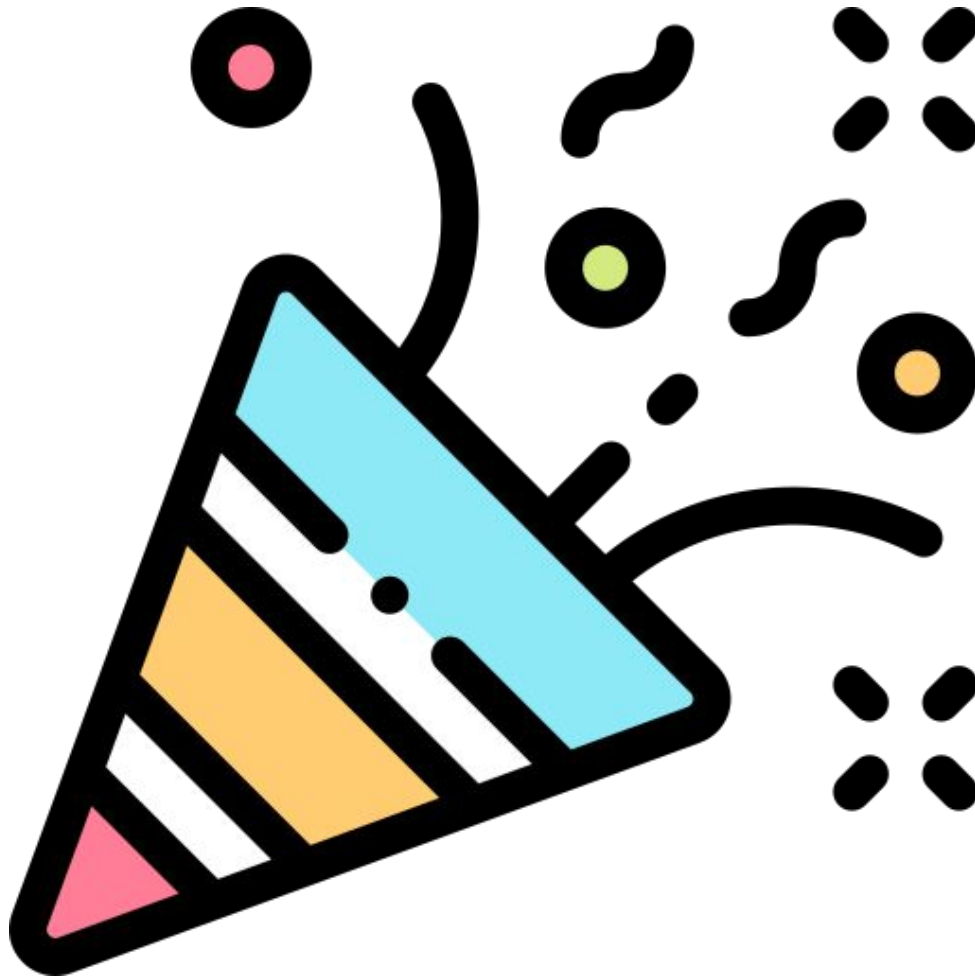

The Assignments and Testing have changed to be what I wanted and hoped for but thought that would never be approved

We won't be physically co-present but we will have synchronous live face-to-face 'zooms' every week

There will be an synchronous open surgery hour 'zoom' once a week

I will be answering questions (probably via Discord) that have been asynchronously left over the space of that week (once a week)

We're Done!
